Full Stack Developer

- Experienced Full-Stack Developer with 7+ years of expertise in designing, implementing, and testing strategic programs and complex applications.
- Specialized in leveraging modern technologies for scalable and innovative solutions aligned with business objectives.
- Recognized for creative problem-solving skills, driving project success and client satisfaction.
- Collaborative team player adept at delivering high-quality solutions on time and within budget through cross-functional teamwork.
- Passionate about continuous learning and staying updated with industry trends to deliver cutting-edge solutions.

Technical Skills

- Programming Languages: **JavaScript, C#**
- Front-end Development: **React JS, Next JS, Redux, HTML5, CSS3, Bootstrap**
- Back-end Development: **Node JS, Express JS, REST API, Graph QL**
- Database: **SQL, No-SQL, MS SQL Server, MySQL, MongoDB, Fire store**
- Cloud Services: **AWS, GCP**
- Version Controller: **Git, GitHub, Bit-bucket**
- Development Tools: **Visual Studio Code, Jira**

Experience

Envigo Technolgies Pvt Ltd Team Lead	September 2020 - Present
Luminescent Software Pvt Ltd Software Engineer	January 2018 - September 2020
Ocuiz Technologies Software Engineer	May 2016 - December 2017

Education

Bachelor of Engineering	2013
Electronics and Communication Engineering	

Projects

Paragon - Industry-Wide Energy Meter Assets

Paragon is a comprehensive energy meter assets management system deployed across the energy sector in the UK. It effectively streamlines energy meter operations and data management.

- Tech Stack: React JS, Node JS, Microservice, CI/CD, Express JS, REST API, Maria DB, ELK, AWS.
- Played a pivotal role in requirement analysis, meticulously planning, and executing the implementation of Paragon.
- Acted as a versatile team member, proficiently handling both front-end and back-end tasks to ensure seamless functionality and user experience.
- Engaged in direct client interaction, effectively understanding their needs and aligning project objectives accordingly.
- Led a dynamic front-end team of three members, overseeing code reviews and task delegation to optimize project workflow and efficiency.

Refinu - Personalized Growth Solutions Online

Refinu: Your dynamic personality ally, harnessing science-backed insights to drive individual and organizational success through tailored assessments, personalized strategies, and actionable development tools.

- TechStack : React, Node.js, and Express.js, NoSQL Firestore database
- Architected a scalable microservices architecture on Google Cloud Platform (GCP), leveraging serverless technologies like Cloud Functions for seamless scalability.
- Spearheaded client discussions to gather requirements, design tailored assessments, and plan personalized strategies for individual and organizational success.
- Implemented push notification functionality to enhance user engagement and retention.
- Contributed to the design, planning, and execution phases, ensuring alignment with project goals and timelines

Go Lyv - Innovative Event Booking Platform

Go Lyv is an innovative event booking platform revolutionizing the event management landscape in the UK. It offers organizers a comprehensive solution to create events, manage tickets, and facilitate seamless ticket purchases for users.

- Played a crucial role in requirement analysis, meticulously planning, and executing the implementation of Go Lyv.

- Acted as a versatile team member, proficiently handling both front-end and back-end tasks to ensure the platform's seamless functionality and exceptional user experience.
- Engaged in direct client interaction, effectively understanding their needs and aligning project objectives accordingly.
- Led a proactive front-end team, overseeing code reviews and task delegation to optimize project workflow and enhance efficiency.

Villager: Social Platform for Community Issue Resolution

Villager is a dynamic social platform facilitating community-driven issue resolution by enabling users to raise, discuss, and prioritize challenges within their villages for government attention.

- Served as a software engineer primarily focused on bug fixes to ensure platform stability and performance.
- Tech Stack: React JS, Redux, Node JS and Express JS, Mongoose
- Implemented chat push notification functionality using Socket.IO to enhance real-time communication among users.
- Integrated Elastic Search for seamless issue search based on locations, enhancing user experience.
